

# Google Meet Series one Room Kits by Lenovo Gen 2

Keep conversations and ideas flowing in this new room kit that redefines today's collaboration experience. It's ideal for organizations using G suite and Google Meet for communication and has unique features like onboard AI and enterprise-grade components. The cost-effective kit comprises all components required for optimum collaboration, including a smart camera, audio bar, and cables. Available in three different sizes – small, medium, and large, it's designed to fit meeting rooms of all sizes and easy to manage and install.

## Purpose-built to improve productivity and collaboration

Combining innovative technology with personalized services, ThinkSmart solutions will improve the way employees work together in today's work-from-anywhere world.

Advanced noise cancellation technology, processed through Google's Edge TPU, helps deliver benchmark audio quality. The AI cameras enable distortion-free automatic framing of meeting participants. The touch controller makes joining meetings and sharing content easy and intuitive.

With the included mounting options, install the compute on or under a table, or behind a display, to keep it out of sight, yet easily accessible. One Ethernet cable keeps the installation process seamless and meeting space organized.

These room kits are easy to shop for, easy to install, and easy to maintain. Most notably, they are the first room kits of their kind to carry the Series One designation, thanks to unique features like onboard-AI and enterprise-grade components.
